# WHO?

HELLO  
[WUZUP.LINK/HERIJTAXES](https://wuzup.link/herijtaxes)

833.944.6292

I'm looking to create a resourceful facebook group that is public for engagement but the goal is to have thousands of people join. I am in several Tax Preparer , Real Estate, insurance, Accounting, Business Owner, Credit repair group. Many create opportunities for people to advertise within the group after it has 10k members. I want to have a Financial Hub or a Financial Vault that encourages Tax Preparers, Insurance Agents, Credit Repair Specialist, mortgage Brokers - all the financial gurus that end up working with the same client to connect. For example as a Tax Preparer I may complete the return for a client that they will use to share with a Mortgage Broker that will take that data to qualify for the person for a home loan. That loan doc will be presented to a Real Estate Agent that will then show and sell the client a home however, before they can qualify they will need to review their credit report and possible have it repaired before qualifying for the mortgage. After getting their home they will need homeowners insurance and to bundle it with auto insurance and then a will or a trust. Based off this data can you help me create five names of facebook groups that accomplishes this goal - keeping it simple, fun, and professional.

Absolutely! Your vision for a collaborative, resourceful, and highly engaging financial professionals' group is excellent. Here are **five Facebook group name ideas** that are simple, fun, and professional, reflecting your “financial hub” concept:

### 🖼️ Graphic Idea

Use your Canva template with this layout:

- **Header Strip:** “5 Bank Accounts Every Business Boss Should Open”

- **Main Graphic Area:** Use icons (or line drawings) for each account type—icons like dollar sign, house, employees, tax, piggy bank or savings
- **Sub-area / Lower Panel:** Short bullets of the 5 accounts (keep text crisp)
- **Footer Band:** Your engagement question:  
“Which one do you already have? Which are you adding this week?”
- **Branding:**  
Your logo or group name subtly visible, consistent color scheme (luxury feel if that’s your vibe—golds, soft neutrals or deep jewel tones), clean & minimal fonts.

Here’s a step-by-step plan + copy you can use to create and share an editable Canva file with this first post. Because I can’t generate actual Canva files for you, this will help you set it up yourself (or with a designer) and share it in a way your group can use.

---

### How to Create the Editable Canva Template

1. Open Canva (Pro account recommended for full features).
2. Create a new design: 1080×1080 px (square) for Facebook/Instagram post.
3. Design structure:
  - Header strip at top for title (“5 Bank Accounts Every Business Boss ...”)
  - Main area with icons + text (the 5 accounts)
  - Lower panel or footer with engagement question.
  - Add branding (logo/handle) in corner.
4. Once done, click **Share** → **More** → **Template Link** and set it “Live.” *Note:* as of June 2, 2025, creating new template links requires a Canva Pro or Teams account. ([branddigital.co](https://branddigital.co))
5. Copy the Template Link and share it with your group.

### ⚠ Things to Know / Best Practices

- Ensure your Canva Pro account is active so the **Template Link** feature is available. ([fresh-catalog.com](https://fresh-catalog.com))
- If group members don't have Pro accounts, they might face restrictions with editing or accessing template links. ([branddigital.co](https://branddigital.co))
- For free users, one workaround is to share a "viewable" link + instructions for them to *make a copy* for personal edits. ([creativememories.zendesk.com](https://creativememories.zendesk.com))

If you'd like, I can draft **5 different color/style variations** of the template layout text—so you have options to mix and match based on your brand feel. Do you want those too?
